Can

- **Develop expertise in new and emerging technologies very quickly.** 100% self taught and comfortable working in dynamic environments.
- **Design and build complex systems.** Shipping in a web scale environment to millions of customers.
- **Effectively lead and motivate agile engineering teams.** Most comfortable working with teams of two to six.
- **Satisfy product stakeholders and customers.** With clear communication and consistently good delivery.

Has

- **Refactored Netflix Social Infrastructure**. Improved reliability, performance, throughput, instrumentation, and engineering productivity.
- **Implemented global device routing for Netflix Streaming Infrastructure.** During expansion to Latin American and Europe solved significant challenges associated with data locality, device testing, and inconsistent device capability.
- **Incubated Satori, a scalable graph store that helps Bing compete with Google**. Satori (http://bit.ly/LRW5N0) has been successfully adopted by the Bing engineering team.
- **Consistently ranked amongst peers as a top contributor at Netflix and Microsoft.** Receiving multiple promotions while holding Senior Program Manager and Senior Software Engineer titles.
